FEATURED PROJECTS

NATIONAL CARD DATABASE

Development of custom ERP system that implements the most important commercial, manufacturing and distributional processes. It is used in 10+ countries by 500+ educational institutions and is integrated with a large number of commercial and public service providers. The system manages over 2 million customers.

BUSINESS INTELLIGENCE

Implementation of BI tool transforming raw data from applications, budgets and websites into meaningful and useful information for business purposes. Set-up of KPIs and training of business users to get insight into sales, orders, customers, card usage, stocks etc.

ISIC.CZ WEBSITE

Design and development of new ISIC.cz portal for customers and partners based on content management system with completely reworked database of discounts and newsletter system.

UNIQA INSURANCE

Design and development of key B2C & B2B application for selling of travel and health insurance online and through appointed agents. The system is fully automated so customers get the insurance contract immediately after the payment. The application is optimized for mobile devices and also supports affiliate sales.

IT SERVICE MANAGEMENT

Introduction of processes based on ITIL including service catalogue management, incident and problem management, request fulfilment, service asset and configuration management, change & release management. Launch of service desk for the whole group.

MICROSOFT CLOUD

Set-up of Office 365 and migration of data from dedicated Exchange and SharePoint servers. Development of new intranet portal and implementation of Microsoft Dynamics CRM.
